RUBEN D. LOPEZ

Senior Analyst Programmer

PROFILE

I am an Analyst Programmer with strong background in process automation and systems integration. I have more than 10 years of experience in high available enterprise applications, web and intranet development, process implementation, and database applications.
I have helped companies to discover, build and support their core systems and business processes, by giving my technical expertise. During the last 10 years, I have worked for financial and insurances companies, HR, supply chain, mining and government.
